

About SRECTrade

Founded in 2007, SRECTrade has brought transparency and efficiency to the emerging SREC markets in several U.S. states. The online platform attracts thousands of visitors each month, making it a crucial gateway to financing solar projects with SRECs.

Installer Benefits

SRECTrade's installer partnership program provides a simple, transparent, and long-term solution for installers looking to provide an SREC service to their customers. Our EasyREC aggregation takes all the effort out of managing and transacting SRECs, automating the monthly auction process.

Turn-key solution

Enroll your customers in EasyREC and SRECTrade will take care of everything SREC-related from state registrations, to SREC creation tracking and transacting, to billing and payments

Monthly recurring revenue

Your company receives a commission for every SREC sold by your customers

System Size	Commission
0-250 kW	3%
250 kW – 500 kW	1.5%
500 kW – 1 MW	1.0%
≥ 1 MW	0.5%

Access to your customers

The online Installer Portal gives our partners visibility into their customers at every stage of the process. SRECTrade empowers installers with the information necessary to serve the post-installations needs of their customers.

High customer satisfaction

Our focus is on customer service and ease of use. Our fees are transparent and we strive to provide options and flexibility for your customers. We stand by the quality of our service and don't lock your customers into unnecessary contracts.

Key Features of EasyREC

In contrast to other aggregations, SRECTrade gives you customers the tools and flexibility to control and manage their own SRECs with an easy-to-use interface.

State certifications

Our integrated online application process gives users the ability to apply to any state in which they are eligible. Applications to the home state SREC program are free of charge. Additional states cost \$50 per application. Applications take up to 8-10 weeks to be approved by state regulators.

SREC tracking account management

Once approved, the tracking account is set up with the state's SREC Registry, which is fully integrated with the customer's online SRECTrade account. Customers can log into SRECTrade at any time to report generation, view SRECs that have accrued and check their transaction history.

Competitive market prices

Since launching in 2008, SRECTrade's prices have consistently led the market. Unlike other services, SRECTrade's auctions drive enough volume to attract the largest buyers in the market, paying top dollar for the SRECs available.

Service	EasyREC Fees		
	EasyREC Fee	Seller Fee	Total Fees
0-50 kW	5%	2%	7%
50-250 kW	3%	1.5%	4.5%
250 kW – 500 kW	1.5%	1.0%	2.5%
500 kW – 1 MW	1.0%	0.5%	1.5%
≥ 1 MW	0.5%	-	.5%

Getting Started (Easy as 1-2-3)

- 1) Fill out the Partner-Installer application
- 2) Customers fill out EasyREC application
- 3) Get paid when your customers sell their SRECs

The Installer Portal

The visibility provided by the online Installer Portal enables our partners to serve the needs of their customers, well beyond the date of installation.
